

Science-Family Challenge and a bit of fun!

Dear Parents,

On our website page there are some Family Science Challenges. These are for all the family to do together. Choose whichever ones you want to have a go at doing and check you have the equipment (it is mostly what you have already got in your cupboards so hopefully easy).

The science is also explained on them which is very helpful.

Have fun, work together as a team and most importantly enjoy the challenges as a family and learn some science together.

When you complete a challenge please do email your child's teacher on their class email. They will love hearing about and seeing photos of what you have achieved.
